Summary

Driving meaningful change through design is what excites me most. As a Product Designer with a passion for minimalist, human-centered digital products, I specialize in solving complex challenges through simplicity and purpose. My journey is defined by a deep curiosity and an eagerness to learn and grow. I am not just looking for a role, but for a long-term partnership where I can contribute my strategic thinking, empathy, and technical understanding to a team that values continuous development and excellence.

Projects

[Challenginno](#) - Product Designer Jun 2026 - Jun 2026

- Aligned user experience with new product strategies by redesigning the homepage's information architecture, enabling users to swiftly choose between theoretical learning and practical engagement with minimal interaction friction.
- Strategically guided user behavior based on business value by implementing a purposeful visual hierarchy, establishing a strong Primary CTA to funnel traffic toward the "Challenge Paths" as the platform's core value proposition.
- Architected a highly scalable user flow by transitioning navigation to a dedicated page rather than relying on dropdown menus; this product decision prevented cognitive overload and future-proofed the platform for unlimited content expansion without compromising the visual layout.
- Engineered the learning flow to drive user retention by structuring step-by-step paths and deploying a dynamic visual feedback system for progress tracking, directly amplifying user engagement and fostering a sense of achievement.
- Optimized expectation management at the entry point by designing structured information cards that transparently present key data-such as required skill levels and total challenges-prior to user commitment.

[Existence Office](#) - Product Designer May 2026 - Jun 2026

- Spearheaded the end-to-end UI/UX design of a minimalist digital portfolio and real estate platform tailored for an architecture firm in Northern Iran, balancing functional user flows with high-end aesthetics.
- Crafted a unique, avant-garde visual identity by implementing cinematic, editorial magazine-style layouts that elevated the brand's digital presence and created a highly engaging, immersive user experience.
- Accelerated the design workflow and rapid prototyping phases by integrating advanced AI-assisted design tools, including Google Stitch, Uizard, and Figma AI plugins, leveraging effective prompt engineering to streamline component generation.
- Collaborated directly with primary stakeholders to gather requirements, define the platform's information architecture, and translate abstract branding concepts into a clear, user-centric product strategy.

[Theypaid](#) - Product Designer Aug 2025 - Oct 2025

- Led the end-to-end UI/UX design of a non-custodial crypto payment platform, establishing a seamless store creation flow and intuitive merchant management dashboards.
- Architected a strategic three-way wallet integration system (Internal Wallet Creation, Software Connect, and Advanced Hardware Setup) that eliminated user onboarding friction across diverse technical skill levels.
- Resolved a critical user-experience and technical bottleneck regarding Derivation Paths (BIP44/49/84) by designing a secure xPub input mechanism and an address preview table, mitigating the risk of permanent fund loss and reducing projected support tickets.
- Optimized core merchant retention and monitoring by implementing high-impact KPI metrics, interactive sales trend charts, and asset portfolio distributions on the primary Store Dashboard.
- Designed zero-data states (Empty States) across core modules to streamline the first-time user journey, deploying actionable inline CTAs that guide new merchants directly toward generating payment links.
- Formulated unified developer integration modals for secure API and Secret Key deployment, balancing straightforward cryptographic copying with minimal layout cognitive load.

[Boomvand](#) - Product Designer Intern Jun 2025 - Aug 2025

- Analyzed user behavior and identified friction points using Hotjar to inform data-driven design decisions and improve the overall user journey.
- Conducted usability testing on initial prototypes and iteratively refined the interface based on real user feedback to ensure a seamless experience.
- Executed the end-to-end design process from user research to final high-fidelity UI for core product modules.
- Translated behavioral insights into actionable design improvements, ensuring the product effectively addresses complex user pain points through simplicity.

[Jalink](#) - Product Designer Sep 2025 - Nov 2025

- Spearhead the UX/UI design of a new startup product, a project currently in development, to address the fragmented property management market.
- Work directly on the project's design and strategy as a freelance Product Designer to ensure full alignment with client goals.
- Utilize core Product Design principles to translate user research and personas into a viable product strategy, ensuring the design will address both user needs and key business goals.
- Design a unified channel manager with a central dashboard to automate booking synchronization across multiple platforms.
- Create key features including a unified calendar, smart alerts, and analytical reports to provide hosts with actionable business insights and full control over their properties.

[RCS](#) - Product Designer Jun 2025 - Nov 2025

- Spearheaded the complete UI/UX redesign of a legacy administrative system (RCS), transforming outdated dashboards and complex table pages into a modern, user-friendly interface.
- Enhanced data clarity and operational efficiency by redesigning metric cards to include actionable trends and implementing a strong visual hierarchy.
- Improved user workflow and reduced cognitive load by restructuring form information architecture and replacing a cluttered layout with a clean, organized design.
- Conducted a heuristic analysis on the existing system to identify key usability issues, which directly informed design decisions and focused the redesign on critical pain points.
- As a freelancer, I worked directly with the technical team to ensure a seamless design-to-implementation process and resolve technical challenges effectively.
- With a modern skeleton screen, I improved the user experience in system states, replacing an outdated and distracting loading animation.

[Joblin](#) - UI/UX Designer Feb 2025 - Apr 2025

- Designed and delivered over 70 responsive web pages for Joblin, adhering to Auto Layout principles and pixel-perfect standards, establishing a scalable UI library that significantly reduced front-end development time.
- Built a scalable component system with variants and created a comprehensive UI library to ensure design consistency.
- Defined visual style guides including typography, color systems, spacing, and layout grids.
- Created interactive prototypes using Figma to communicate user flows and test design ideas.
- Worked collaboratively within a design team to maintain consistency, exchange constructive feedback, and streamline the design workflow.
- Published the entire project as a free, open-source file on the Figma Community, accessible for preview and download.

[Doctor Hamrah](#) - Product Designer Jun 2024 - Aug 2024

- Conducted in-depth interviews with 30 users and developed personas to identify and address their real needs.
- Compiled a comprehensive design document that outlined visual standards and branding principles, ensuring consistency across the application.
- Designed and implemented a complex application featuring over 120 pages within a tight 1.5-month timeframe, accelerating the time-to-market while maintaining rigorous visual standards.
- Collaborated in a team of five to create and test prototypes, gather user feedback, and resolve design challenges, leading to effective solutions.

[100](#) - UI/UX Designer Mar 2024 - May 2024

- Analyzed the strengths and weaknesses of 5 key competitors, which improved the design strategy and enhanced user engagement in the final app version.
- Designed a comprehensive site map that established a user-friendly and logical structure for the application.
- Delivered over 80 mobile screens and a landing page within 1.5 months, implementing a cohesive design system that streamlined the development handoff and expedited the final app launch.

Skills

- Problem Solving

○ Responsive Design

○ Design Systems

○ User Research
- Critical Thinking

○ Design Thinking

○ Usability Testing

○ Journey Mapping

Tools

- Figma

○ Adobe Illustrator

○ Photoshop

○ React

○ Java Script

○ HTML/CSS
