About Me

The designer, Sharzad Jafari, has experience in creating user-centered, practical, and attractive designs. She is skilled in identifying user needs to meet them with innovative and easy-to-understand designs, enabling users to find solutions to their needs within our product. The designer aims to create a simple and enjoyable user interface that provides a delightful and innovative experience for users. By updating her skills in the field of UI/UX, she strives to achieve the best possible design. She has experience collaborating and participating in design teams to deliver the best user experience with an engaging touch.

Projects

40/2024 - 60/2024

User Experience designer

Design the user Interface for Doctor hamrah

using user experience skills

- This teamwork project was completed in a limited time. (Two months)
- in this project i had interview with +10 people in person to know about getting doctor's appointment problems
- A survey was also designed to help us better understand people's problems on the way to taking an appointment.(+50 people)
- Me and mt team benchmarked +8 getting doctor's appointment.
- We found solutions in line with the results of the problems, including, losing medical things such as prescriptions, tests, medical records. and the problems of getting an emergency appointment, the list of hospitals in the whole country,
- we designed +50 pages in a limited time.(one month)
- A usability test was conducted to know the problem details about our application

40/2022 - 70/2022

User Interface Designer
